# MAJOR RENOVATIONS

Diving Board  
Installation

Consistent use of a pool or spa eventually results in regular wear and tear on the pool, spa, surrounding deck area, and pool equipment. From crumbling tile or coping to cracked plaster and decks, Carter Aquatics would love to intervene before that regular wear and tear becomes a major problem.

Carter Aquatics offers a variety of budget friendly renovation services including:

- Automation
- Coping & Tiling
- Filtration Systems
- Fire Features
- Fountains
- Lighting
- Negative Edges
- Overflow Perimeter Pools
- Saline Chlorination
- Sun Ledges
- Upgraded Interior Pool Finishes
- Vinyl to Shotcrete Conversions
- Waterfalls
- Zero Entries

# RENOVATION BENEFITS

Whether you're looking for some minor cosmetic updates or a complete overhaul of your existing pool or spa there are a number of benefits that come with a renovation.

Thinking of selling your home? A well maintained pool accompanied by a beautiful outdoor space can really add to your selling experience. Below are a few benefits of some of our more in depth renovation services.

**- Coping & Tiling:** Coping and tile work are exposed to the elements and the chemicals in your pool's water. Eventually, signs of this exposure will begin to show. Replacing cracked or crumbling tile and coping will not only clear up a safety hazard but also reinforce your pool visually and structurally by keeping everything sealed tight and in place.

Pool Awaiting New  
Coping

**- Filtration Systems:** Maintenance of your pool's filtration system is imperative to your pool's upkeep. Upgrading your system will mean less work, less headache, and more fun.

**- Saline Chlorination:** Saline Chlorination (sometimes referred to as Salt Water Chlorination) is a process that uses dissolved salt to keep your pool clean. Aside from the lack of chlorine's chemical odor, saline chlorination requires less money and labor to maintain. This sanitation process means the irritants associated with traditional chlorination in swimming pools are greatly reduced.

Pool Being  
Re-plastered

**- Upgraded Interior Pool Finish, Vinyl to Shotcrete Conversion:** Maintaining the interior of your pool is an extremely important aspect of your pool's lifespan. All of our pools are built using shotcrete and finished with plaster. Shotcrete allows us to build virtually any shape imaginable and means your pool's interior will last longer than a vinyl or fiberglass interior. We offer a variety of colors and plaster finishes.
