

Chemistry for a Blue Planet

AGC Chemicals

We Are Humbled by the Earth's 4.6 Billion Years.

AGC Chemicals was founded in 1917. This year is our 100th anniversary.

Chemistry has brought humanity precious benefits — safety, convenience, health — a higher quality of life.

But we have sacrificed something priceless: the quality of our natural environment. This beautiful, bountiful Earth was formed 4.6 billion years ago. Yet it took just two centuries for industrial civilization to bring our planet's ecosystems, oceans and atmosphere near the brink of destruction. Our challenge is to reduce environmental impact without compromising the quality of human life. The key is 'sustainable chemistry' that seeks harmony with the environment.

At AGC Chemicals, we continuously ask ourselves, 'What would the Earth want?'

The answers will guide us over the next 100 years.

Our History Spans 100 Years. Our Vision Spans Another.
